SUMMARY

I aim at becoming a great fullstack developer.

- Frontend developer
- Backend developer
- Database developer

EXPERIENCE

Frontend developer, UVdata A/S

Aarhus, 2017 - present

At UVdata A/S I am developing new features in a big, complex Angular Single Page Application. Most of my work on this project is frontend work but I get to write some backend code in C# from time to time as well.

Web developer, Pragmasoft A/S

Tranbjerg, Aarhus, 2016 - 2016

At Pragmasoft A/S I had various tasks in frontend, backend and

EDUCATION

Business Academy Aarhus,
**Bachelor's Degree Programme
in Web Development, 2016**

Business Academy Aarhus,
**Multimedia Design and
Communication, 2006**

SKILLS & TECHNOLOGIES

Experience in:

Implementing graphical layouts in templates used in content management systems.

Favorite technologies:

HTML(5), CSS(3),
JavaScript/TypeScript, AngularJS
(ver.1.5), C# / .Net MVC, REST
API's, NodeJS, Umbraco CMS

databases. These tasks included testing, fixing errors, adding new features to existing projects and starting a project from scratch.

Accomplishments

- webshop
 - Fixing errors and adding new features (frontend + backend)
 - Improving database performance by coding Lucene indexes
- Umbraco CMS module
 - Started a project from scratch integrating the listed components.
 - Umbraco CMS
 - uCommerce ecommerce platform
 - MailChimp

Frontend developer, Økologisk Landsforening Åbyhøj, Aarhus, 2012 - 2013

At ØLF I developed templates used in Umbraco CMS to run okologi.dk - the main site of ØLF. I also developed various campaign sites from given graphical layouts.

Accomplishments

- Maintenance and development of okologi.dk
- Development of subsites and campaign sites
- Responsible for web server running

Frontend developer, CrossMind Reklamebureau Vejle — 2010 - 2011

At Crossmind (advertising agency) I developed sites from given graphical layouts in Umbraco CMS. I also did minor tasks in content and media editing.

Accomplishments

- Developing 999.dk from scratch
 - Site has three language layers: Danish, English and Chinese
- Developing chickencat.eu from scratch
 - Converting and editing of video material
- Moving nek.dk from static site into Umbraco CMS

REFERENCES

On request.

- Copying and adjusting templates to new platform
 - Editing and conversion of content
- Handing over reecon.dk to users
 - Presentation of and instructing in use of new system

Internship as Frontend developer, InterRepro

Åbyhøj, Aarhus — 2007 - 2008

At InterRepro I did an internship as a multimedia designer / frontend developer. I built websites, made Flash banners and menus and had various other tasks.

Accomplishments

- Developing Flash menu used on dianova.dk
- Making of Flash banners used on hatting.dk
- Making of a multimedia presentation in Flash for hatting.dk
- Proofreading of hatting.dk
