---

## SUMMARY

I am an open minded and curious frontend / fullstack developer.

My long time goal is to further develop my skills and experience as a fullstack developer.

---

## EXPERIENCE

### ***Frontend/fullstack developer, UVdata A/S***

Aarhus, 2017 - present

At UVdata A/S I am developing new features in a big, complex Angular Single Page Application

I work with both frontend, backend and databases on a daily basis.

### ***Web developer, Pragmasoft A/S***

Tranbjerg, Aarhus, 2016 - 2016

At Pragmasoft A/S I had various tasks in frontend, backend and databases. These tasks included testing, fixing errors, adding new features to existing projects and starting a project from scratch.

### **Accomplishments**

- webshop

---

## EDUCATION

Business Academy Aarhus

### **Bachelor's Degree Programme in Web Development**

2016

Business Academy Aarhus

### **Multimedia Design and Communication**

2006

- Fixing errors and adding new features (frontend + backend)
- Improving database performance by coding Lucene indexes
- Umbraco CMS module
  - Started a project from scratch integrating:
    - Umbraco CMS
    - uCommerce ecommerce platform
    - MailChimp

### ***Frontend developer, Økologisk Landsforening***

Åbyhøj, Aarhus, 2012 - 2013

At ØLF I developed templates used in Umbraco CMS to run okologi.dk - the main site of ØLF. I also developed various campaign sites from given graphical layouts.

#### **Accomplishments**

- Maintenance and development of okologi.dk
- Development of subsites and campaign sites
- Responsible for web server running

### ***Frontend developer, CrossMind Reklamebureau***

Vejle — 2010 - 2011

At Crossmind (advertising agency) I developed sites from given graphical layouts in Umbraco CMS. I also did minor tasks in content and media editing.

#### **Accomplishments**

- Developing 999.dk from scratch
  - Three language layers: Danish, English and Chinese
- Developing chickencat.eu from scratch
- Moving nek.dk from static site into Umbraco CMS
  - Copying and adjusting templates to new platform
  - Editing and conversion of content
- Handing over recon.dk to users
  - Presentation of and instructing in use of new system
